

Crescent's legendary illustration boards continue to be known for their superior performance and quality.

The Cold Press surface of the **99 Illustration Board** is a perfect textured surface for both fine ink and colored pencil work. The board also accepts techniques such as impressed lines. It is acid-free, to preserve your masterpieces for a lifetime.

Materials

- 9" x 12" - 99 Illustration Board - Cold Press
- 3H Graphic Pencil
- White Eraser
- Embosser with small 1mm ball
- Black Permanent Pen, Fine
- Wax Based Colored Pencils

1. Using the graphite pencil, sketch out your design.
2. With the fine black pen, ink in your black line details. The surface takes the ink flawlessly with no running or skipping.
3. With the embosser, press in the white lines. Keep the pressure even for the best results. If you find the embosser skipping on the surface, simply lubricate it by running over a piece of wax paper before impressing your lines.
4. Add the colors. Start off with a light touch, and layer colors as you go. The pressure can be built up as you go for darker shades. The white impressed lines will show up and will not diminish, even with very hard pressure. The quality of the illustration board results in nice, crisp white lines in the finished piece.
