Light Learning: Uppercase Letters

For more information, ideas, inspiration and to view a video, please visit www.roylco.com/product/R49703.

Appeal to the senses while learning the alphabet and spelling simple words! For students with fidgety fingers, these squishy letters make learning language tactile. The small disc inside each letter allows students to develop fine motor skills. Children will quickly learn how to propel the disc by tapping the letter in different areas. We have doubled up on commonly used letters (A, D, E, H, I, L, N, O, R, S, T, U). Tip: All the vowels are red!

Ideas: Develop fine motor skills! Ask students to move the small discs all the way around a letter. O's and I's are great for beginners, while Q, H and K are great to challenge older students.

Make glowing words! Use a light table or Roylco's R59601 Light Cube to spell out student's names, sight words, vocabulary words or pets' names.

Play with colors! Layer letters on top of one another to make new color combinations. This is a great activity for light table play.

For very young light learners these letters are fun to sort by color!

Enjoy your letters for many years; always store them FLAT.
